Re: Don't recommend anything to damage Galveston Bay.

Dear Mr. Miller:

Please recommend a permanent cap for the San Jacinto River Waste Pits. The current cap has never leaked since its installation in 2011. The only remedy for everyone is to make the current cap on the waste pits and make it permanent—this has been identified as Alternative 3.

I know the EPA is looking at other alternatives, but those carry too much risk for those of us living near Galveston Bay. Proposed remedies other than Alternative 3 potentially expose the entire bay area, especially in a bad weather event.

Please don't make a recommendation that would do damage to Galveston Bay.

Sincerely,

(b) (6)
